which is shown to be the excess of Republican over Democratic appropriations, and instead of saving a million and a quarter of dollars, as they claim, we find them charged with an excess of \$311,774 45.

This calculation is based upon the plain proposition that appropriations are intended to cover the time for which they were made, and that the people do not expect any Legislature to lock the money up and refuse to pay the honest debts of the State. But having exploded their fraudulent and groundless claim of saving to the people over a million dollars, let us look a little further into the acts of this very economical party. In reorganizing the institutions of the State, we find that in order to make places for hangry and impecunious members of their party, they created the following new positions.

Many of the appropriations for the several benevolent, penal and reformatory institutions are aircady exhausted, and nearly all of them will run out before the 15th day of November, thus leaving deficiencies for three months of the time that they were intended to cover. You see, then, that the way a Democratic Legislature saves money for the dear people is to lock the money up in the vaults, and then run the State on credit.

Mass of allments are the natural result. The appropriations for running the State Honse and grounds gave out some time ago, and the poor men who do the hard work of the Liver.
